

# SENIOR LOGISTICS CONTROLLER

This is a new and exciting opportunity to join our team to support the continued growth of an established family-owned business in Leeds. Wilson Power Solutions are a leading manufacturer and supplier of electrical power distribution equipment and pioneers of ultimate low loss amorphous transformer technology. Our flagship product saves money, saves energy, cuts carbon and offers an innovative solution to the worldwide challenge of reducing energy wastage.

## What is the Role:

Oversee, manage and optimise international and domestic supply chain operations. You will have a solid understanding of international logistics, including import/export regulations, customs procedures, and global transportation solutions. You will be responsible for ensuring the safe, efficient, and cost-effective import, handling, and customs management of transformers from India to UK, and then UK logistics, handling and storage - including factory and customer sites. You will ensure compliance with all relevant laws and regulations with an emphasis on Health and Safety and cost optimisation. You will be responsible for managing Logistics relationships with existing partners and developing solutions and processes for the "onboarding" of new partners in order to provide Wilson Power Solutions with competitive rates and to optimise service levels and availability. This role requires strong analytical skills, excellent communication abilities and a proactive approach to problem solving. You will work closely with various departments including Procurement, Sales, Projects, and Contracts. You will ideally have a proven track record in international logistics management with a focus on optimising processes, reducing costs and improving service levels. You will also be responsible for managing relationships with third-party Logistics partners, negotiating, and managing Logistics contracts and monitoring performance, ensuring our Logistics partners meet our high standards. In addition, you will be expected to stay up to date with industry best practice and to continuously seek out opportunities for improvement. This is a challenging and rewarding role that offers the opportunity to make a significant impact on our business.

## Key Responsibilities:

- Selecting and "onboarding" Logistics partners, negotiating solid contracts and managing KPI's including the optimisation of operations rates.
- Planning/monitoring transformer deliveries to/from UK ports, site, UK storage
- Supervising logistics, warehouse, transportation, and customer services
- Researching and developing ideal shipping techniques, routes, and carriers
- Incorporate logistics into company procedures, operations, and processes
- Ensure compliance with import/export regulations and customs procedures - including HS code allocation
- Updating and evaluating KPI's, optimising performance and driving efficiency
- Assist in managing shipment and custom activities for import services
- Identify, eliminate logistics obstacles to ensure safe and timely logistics activities
- Break down Logistics activities and develop standard operating procedures
- Inform of cost changes, shipment issues, supply concerns and solutions to team in a timely manner
- Optimise transportation methods and consolidate where possible to reduce costs and improve efficiency
- Manage and develop relationships with third-party logistics partners and internal stakeholders
- Develop contingency plans for potential disruptions within the supply chain
- Setting up and maintaining schedules for inbound and outbound shipments
