

SWITCHGEAR & CABINETS

MV SWITCHGEAR

To complement our transformer supply, Wilson Power Solutions carry a wide range of new medium voltage switchgear that can be close coupled or free standing. We have well-established business relationships with the following manufacturers (other manufacturers are available on request):

SCHNEIDER ELECTRIC

Ringmaster Range: RN2d, RN6d CN2, SN6, CE2, CE6 & SE6

LUCY SWITCHGEAR

Sabre: VRN2a, VRN6a

SELECTED DNO APPROVED VARIANTS

For iDNO connections

Features & Benefits:

- Relay or TLF Protection
- Voltage Presence Indication
- Earth Fault Passage Indication
- Top or Bottom Cable Entry
- Protection Relays
- Metering

LV CABINETS

On the low voltage side of a transformer, Wilson Power Solutions supply a range of close coupled LV circuit breaker cabinets, using both ACB's & MCCB's up to 4000 Amps and in line fuse cabinets up to 1600 Amps.

Features & Benefits:

- Metering
- Restricted or unrestricted Earth Fault
- Surge Protection
- Single or multiple fuseways, MCCB or ACB devices
- Removable front panels for ease of installation on site

All of our cabinets are secure, feature a weatherproof housing and are designed to provide long and reliable product life.
